

Colton Francis

Entry-Level Software Engineer

815-878-9359

cfrancis85111@gmail.com

Walnut, IL

Objective

I am a dedicated Computer Science student at Northern Illinois University seeking an entry-level software engineering or internship role upon graduation. Eager to apply strong programming skills in C, C++, and Python, demonstrated through personal programming projects, to contribute to innovative development teams while continuing to grow expertise in low-level systems, interpreters, and efficient software design.

Education

Northern Illinois University

Dekalb, IL

BS in Computer Science

Expected Graduation: Spring 2027

Key Skills

C/C++

Python3

Version Control

Systems programming

Linux System Administration

Project Management

Software Engineering

Nix/NixOs

Experience

Clox – Lox Interpreter (C++) Implemented a complete tree-walk interpreter for Lox language from *Crafting Interpreters* book. Handled scanning, parsing, AST evaluation, environments, and runtime. GitHub:

<https://github.com/cfrancis03/clox>

Thesh – Basic Unix Shell (C) Developed a lightweight shell with command execution, piping, redirection, background processes, built-ins, fork/exec, signals. GitHub: <https://github.com/cfrancis03/Thesh>

Ceditr – Terminal Text Editor (C) Built a simple editor with buffer management, cursor movement, insert/delete, file I/O, raw terminal mode. GitHub:

<https://github.com/cfrancis03/ceditr>
